

Maino Incubators - the leading manufacturer of quality incubators and hatchers for every kind of egg

MPS Starter Range

Our starter range of **Maino** incubators are very durable and a cost effective way to start hatching your own eggs, whether you're a beginner or doing it as a hobby.

There are two in this range, the MPS12M, a manual incubator where you will need to turn the eggs manually and the MPS12A, an automatic incubator which turns the eggs automatically.

Parts are replaceable and spares readily available making servicing easy, please contact your local supplier.

Capacities and other features can be seen in the tables below.

MPS12 A

Canary	Quail Grey Partridge	Red Leg Partridge	Bantam Guinea Fowl Pheasant	Hen Duck Small Turkey	Goose Large Turkey Peacock
45	30	25	24	22	8
30	24	20	12	12	6

Features

MPS12 M

-  360° Vision into the incubator. This plastic is not crystal clear, but slightly opaque.
-  Base is totally washable, Easy to clean out following hatch.
-  Electronic thermo-regulation of temperature. Temperature is controlled by an onboard electronic card, which enabled an accurate precise temperature to be maintained inside your incubator. It is also more precise and will last longer than mechanical thermostat.
-  Accurate Mercury Thermometer, which is located in the top of the incubator for easy, accurate temperature reading.
-  Forced Air Ventilated. A fan in the top of the incubator circulates and mixes the air to both create a uniform temperature over the incubator, and also to exchange used air from the incubator and mix in fresh air.
-  Heating is provided by a high quality silicone covered element
-  Humidity Basin. Humidity is added by putting water in a supplied basin.
